ZIO COIN

The Decentralized Casino currency & platform of the future powered by
Blockchain technologgy

『Zio, a proprietary blockchain based social casino platform』

Zio Cryptocurrency Whitepaper

Our Zio Core Team confirms that the work presented in this white paper is ours. If the information is not from another source, we confirm that it is own marked on the property.

Abstract

Zio is brings the trustiest casino betting to the entire world of a decentralized Casino platform.
Zio is a technology design leap and deflation, and a self-regulatory economy. Through distributed governance and contract fees, structural mechanisms balance Zio token values by dynamically adjusting supply of Current exchange rate and betting volume within the network.
Zio does all these things while avoiding a single point of failure and implementing fully distributed networks and systems.

.

Executive Summary

" Our mission is for customer convenience, trustworthy relationship, quick handling within fun."

The latest appearance of block-chain technology is expected to pave the way for many industries to improve, reconstruct and ultimately recreate the overall quality of their businesses. Online casinos are expected to be one of the main beneficiaries of the trend, as block-chain technology can greatly enhance fairness. Finally, focus on the overall security system. Three of the most vulnerable aspects of the traditional online social casino industry are expected to be a prerequisite for block-chain technology. At the same time, basic game content should still be fun regardless of their platform.

1. Introducing blockchain social casino

Block-chain

The block chain is to differentiate that records a virtual currency transaction It is used as a

technology to prevent hacking in online transactions that require credibility. It is used

as a

security technology for various cryptography.

Online Social Casino

Online social casinos are games played in traditional casinos through social networking services. Online social casinos allow games to be played anywhere in the world. But, due to the closed business structure, they have the following disadvantages.

At the game
-Transparency and fairness doubt
-Player information and difficulty of accessibility
-Unable to trace chip
-Hacking, potential money-laundering activities and security issues (Ex : centralized data system)

Despite this, the online social casino market has continued to grow. The online social casino market is expected to reach $ 46 billion by 2017 and $ 56 billion by 2018. Split capital ' estimates the market will reach $ 60 billion by 2020.

2. Value proposition for holders of Zio

You don't have to be a potential trader who can win just by grabbing and holding a Zio coin.

Zio is optimized for growth. The controlling deprivation of coin supply means that as Zio'sadoption increases, systematic breakdown of fares puts rising pressure on the price of coins.The person who runs the mail archive will be in the newly cast Zio as the wallet contributesto network security. You will have the amount like of mail in your wallet.

3. Activating an Zio Masternode

Activating an Zio Masternode is the process by which an individual chooses to promote their node contract of service an become a consensus agent.

Zio Masternode requirements:

● 10000 Zio coin
● Public IP with a forced network port number
● Bandwidth to accommodate the total volume of API calls

Rewards:

Zio coin has a dynamic compensation structure. Compensation is increase as the block number increases. Compensation is divided into 75 % for Masternodes and 25 %for Stacking. The Stacking and Masternode has option of Single wallet setup. This means that users don't need to save money because wallets provide a Masternode service and rewards for putting coins same with Staking. Wallets can be used in a number of Masternodes and all rewards can be automatically fixed.

.

Block Height	Masternodes	PoS
201 - 8000	75% (4.5 ZIO)	25% (1.5 ZIO)
8001 - 16000	75% (6 ZIO)	25% (2 ZIO)
16001 - 30000	75% (7.5 ZIO)	25% (2.5 ZIO)
30001 - 50000	75% (9 ZIO)	25% (3 ZIO)
50001 -	75% (10.5 ZIO)	25% (3.5 ZIO)

Specifications:

Coin name: Zio coin. Ticker / Symbol : Zio Max supply : 40,000,000

Coin type: POW (10%) used totally for pre-mine. Now coin is POS only! Which is very good for the Masternode holders. PoS

Hashing algorithm: Zio protocol Block

reward: Dynamic

Benefits of investing in Masternode coins:

Early investors receive the coins for $ 0.2 per coin. Early investors can make Masternodes with the 10,000 coins they received. If they have quantities greater than 5,000 or less than 5,000, they can hide out.

This is why users can start making their own money before the coins enter the exchange. We plan on listing the coin on cryptobridge, cryptopia, hitbit, gate.io, kukcoin, to ensure proper liquidity.

There are 1,400 blocks a day.

Example: 14 coins per block compensation is divided into 75 % for Masternodes (10.5) and 25 % for Staking (3.5). Further compensation is distributed to all ongoing

Masternodes. The highest number of the Maternode, the less the reward. The reason why it compensation is distributed to each Masternode in a timely manner. Coin Distribution of 4,000,000 (10%) pre-mine Due to the fact that the Masternode Compensation Program is a fixed rate and that the Masternode Network Node is fluctuating, the expected Masternode compensation will depend on the current total amount.
